11. Indicate the item numbers reported herein: Item 9.

This has reference to the news articles, which the Philippine Stock Exchange has requested Semirara Mining and Power Corporation (the "Company") to make a clarification and/or confirmation, as follows:

1. "Semirara to build 1,100 MW coal-fired power capacity" posted in BusinessWorld Online on July 29, 2015. The article reported in part that:

"SEMIRARA Mining & Power Corp., the country's biggest coal miner, said on Wednesday it expects to bring on stream 1,100 megawatts (MW) of power capacity in the next three to four years, offering a market for its expanding coal mining business.

Semirara Chief Executive Isidro A. Consunji said plans were underway to build a 700 MW power facility, while a 300 MW plant was scheduled to begin commercial operations in the main island of Luzon this year

. . . . "

. . . .

We wish to confirm the news article posted in BusinessWorld Online regarding additional power plants with clarification that the total capacity expected to be on stream in the next three to four years is only 1,000MW, of which 300MW is expected to be commercially available before the end of this year. The latter refers to the 2x150MW CFB power plants (Units 3&4) located in Calaca, Batangas, under Southwest Luzon Power Generation Corporation, a wholly-owned subsidiary of the Company. Unit 3 is currently undergoing synchronization in the Luzon grid while Unit 4 target synchronization is set on August 2015. Both units are expected to be in commercial operations before the end of the year.

2. "Semirara Mining mulls new safety protocols" posted in Inquirer.net on July 30, 2015. The article reported in part that:

·····

. . . . "

With the Panian mine about to deplete its reserves in one and a half years, Semirara is now working on a new mining site, the Narra mine, which is expected to be in full production by the middle of next year, Consunji said.

We also wish to confirm the statements made by Mr. Consunji in the news article posted in the Inquirer.net regarding new safety protocols that the Company will implement at its mine site in Semirara Island, Caluya, Antique including the installation of a slope stability radar (SSR) for real time slope stability monitoring or detection of slope movements. Also, we confirm that with the scheduled depletion of the Panian mine, the Company is expected to be in full production by the middle of next year at the Narra Mine (formerly named Bobog pit/mine).

In addition, we also disclose that today, July 30, 2015 we receive a letter from Certification International Philippines, Inc. (CIPI) suspending the Company's Certification on its Integrated Management System (IMS) under ISO 9001:2008, ISO 14001:2004, and OHSAS 18001:2007 in view of the suspension of the Company's Environmental Compliance Certificate and the on-going investigation by the Department of Energy relative to the accident at the Company's Panian mine last July 17, 2015. The suspension of the Company's ISO Certificates will be lifted upon DOE's and EMB's lifting of their suspension orders and upon on-site audit verification by CIPI of the Company's completion and implementation of corrections and corrective actions under its IMS.

SIGNATURES
